## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 1-33 and 39-48 are allowed. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because it recites speech-based information retrieval in Mandarin Chinese using as indexing terms adjacent ("overlapping") syllable segments of a specific number of syllables in sequence ("specific length"), wherein the specific length can be assigned arbitrarily.

While Lee-Feng Chien *et al* teach using Mandarin Chinese syllables for information retrieval in Mandarin Chinese, they do not teach the use of syllable sequences of arbitrary prespecified length as indexing terms to do so.

Claim 6 is allowed because it recites using Mandarin Chinese syllables separated by at least one syllable as indexing terms for speech-based information retrieval in Mandarin Chinese.

While Lee-Feng Chien *et al* teach using Mandarin Chinese syllables for information retrieval in Mandarin Chinese, they do not teach the use of syllables separated by an arbitrary prespecified number of syllables as indexing terms to do so.

Dependent claims 2-33 and 39-48 are allowed because they further limit their independent claims or their parent claims.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Claim Objections***

3. Claims 34-38 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiply-dependent claim. See MPEP § 608.01(n). In this instance the multiple dependence of claim 34 already includes multiple dependence on claims 12 and 14, which in turn are dependent on multiply-dependent claims 11 and 13, respectively. Accordingly, the claims 34-38 have not been further treated on the merits.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lin-Shan Lee *et al* (ICASSP 1997) teach using syllables for Mandarin voice record retrieval.

Berlin Chen *et al* (IEEE Trans SAP, July 2002), published less than a year before the foreign priority date of the instant application, includes a portion written by the inventor, teaching his syllable-based approach to information retrieval.

John H. L. Hansen (IEEE Trans SAP, September 2005) reviews the various approaches used in spoken document retrieval from speech queries.

5. This application is in condition for allowance except for the following formal matters: the need to correct the multiple dependency of claim 34.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
